Shoaib Aslam

Computer Science Graduate Full-Stack Web Development

+92 301 0305639 shoaibaslam3815@gmail.com shoaibaslam-regs

A motivated Computer Science fresher with knowledge of software development, databases and modern web technologies seeking an opportunity to learn, grow and add value to a progressive organization.

PROJECT

• **DiscountsEmporium — Smart Deals Platform**

Node.js · MongoDB · REST API

- Built a platform helping Pakistani shoppers discover the highest discounts and verified deals from multiple brands and online stores in one place.
- Designed backend APIs for deal aggregation, brand filtering, and price comparison across multiple e-commerce sources.
- Implemented database schema for storing and querying deals, brands, and user preferences efficiently.

AutoMarket— Full-Stack Automobile Marketplace

github.com/shoaibaslam-regs/automarket

- Architected a full-stack automobile marketplace supporting **buy, sell and rent** workflows for 3 user roles (Buyer, Seller, Admin) with JWT authentication, Google OAuth, and role-based middleware.
- Built a **rental booking engine** with date-conflict detection, automated email notifications, status management (PENDING → CONFIRMED → COMPLETED), and printable booking slip generation.
- Integrated **Google Gemini Vision AI** to analyze vehicle photos and return damage scores, condition ratings, and PKR market value estimates — with a smart fallback when API quota is exceeded(DEMO).
- Implemented **real-time bidirectional chat** using Pusher WebSockets with polling fallback, unread badges, and read receipts — no third-party chat library used.
- Built a **multi-role admin dashboard** with Recharts analytics (daily/weekly/monthly), user/listing moderation, booking oversight, and 25+ REST API endpoints.
- Delivered a fully **responsive UI** across mobile, tablet and desktop — Including 3-step listing wizard with drag-and-drop image upload, and WhatsApp/email direct contact.

PRACTICAL EXPERIENCE

Software Development — University & Personal Projects

- Developed backend APIs, designed database schemas, and built frontend UIs across multiple academic and personal projects
- Practiced version control with Git and GitHub following collaborative development workflows
- Applied SDLC methodologies including Agile and Waterfall in team and individual project environments

- Learning AI Automation & Agent building with n8n.

SKILLS

FRONTEND: ● JavaScript ● NextJS ● HTML ● CSS/TailwindCSS
BACKEND: ● NodeJS(Express JS) ● REST APIs
DATABASE: ● NoSQL ● MongoDB ● Mongoose
AI TOOLS: ● Research & Analysis: **ChatGPT** ●Development & Coding: **Claude, GitHub Copilot.** AI Automation & Agent Building with n8n.
MICS: ● Git ● GitHub ● Vercel ● Docker ● Agile /Waterfall ● Testing ● SDLC

EDUCATION

B.S. Computer Science
Federal Urdu University of Arts Science & Technology **(FUUAST)** – Karachi | Feb 2026

INTERESTS

● Technology ● Fitness ● Video Game
